

Search & Filter

To search, type the keyword in the text field above the table.

You can find the text filter on:

- Status Report
- Hosts

Field values are not case-sensitive

How to filter by field

To search by field, enter the name of field (e.g. **severity**) , continue a colon (:) , finally put in the word that you want to find.

Examples:

- severity:unclassified
- name:Nessus scan info

DATE	NAME	SEVERITY	SERVICE	TARGET	DESC	DATA	REFS
01/06/2016	Web Server Directory Enumeration	UNCLASSIFIED	(80/tcp) www	127.0.0.1	This plugin attempts to determinate the presence of various common directories on the remote server	Web Server Directory Enumeration	
01/06/2016	SSL Certificate Information	UNCLASSIFIED	(80/tcp) www	127.0.0.1	SSL Certificate Information	SSL Certificate Information	

How to filter by many fields

To search by many field, do a normal search but at the end, type a SPACE BAR and do a normal search again. Just a SPACE BAR in the middle of the consult.

Examples:

- severity:unclassified target:173.252.100.18
- severity:low service:443 target:173.252
